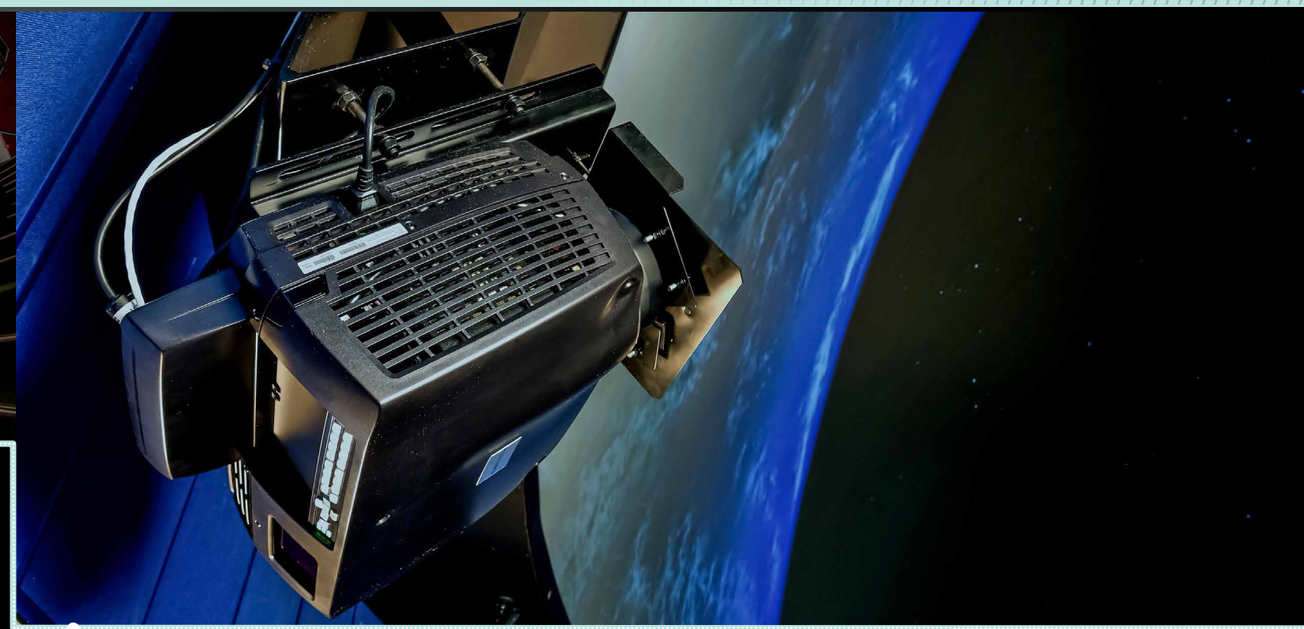
Taipei Astronomical Museum Planetarium

MEDIA

When it comes to the audience experience, it's all about great content in your planetarium. We have many options to keep you on top of the latest trends – sourcing shows for you, making them to your requirements or simply giving you the tools to make your own with our custom software suite. Contact Electrosonic for our latest media and show catalog.

SkyExplorer™ V3
Real Time Universe

For the ultimate in audience engagement and learning, Electrosonic offers the renowned 3D real-time astronomical simulation software SkyExplorer™ through our partnership with RSA Cosmos. SkyExplorer™ can navigate anywhere in the known universe and can achieve, without visual discontinuity, a sequence from the limit of the known universe to the interior of atoms. Using the latest technology in 3D real-time digital images, it reaches a level of realism unequaled in the world of planetariums.



THEATER PLANNING, DESIGN AND INTEGRATION

For over 45 years, Electrosonic has applied new technology to create tailored, state-of-the-art solutions for a wide range of markets including museums, theme parks, control rooms and corporate meeting rooms. Electrosonic draws from its vast engineering resources and expertise in custom projection, 3D and show control, to provide you with theater planning, design and integration solutions without equal.

fidelity™

For today's digital planetarium, Electrosonic's Fidelity range offers an optimum balance of performance, reliability and value. Fidelity immerses the audience in stunning images and sound for an unforgettable and compelling experience.

Exactly which Fidelity digital planetarium configuration is right for you will depend on a number of factors including educational objectives, budget, operating and maintenance considerations, projection fidelity requirements beyond pixel count, size of dome, cost of ownership and flexibility for future upgrades.

Each Fidelity digital theater unites a digital fulldome display, scientific visualization and astronomy tools, media, production systems, and high performance video playback, for a planetarium tailored to your needs.

WHAT MAKES A FIDELITY THEATER?

- Creative, system and technical design
- State-of-the-art and meticulously engineered projection system
- High resolution show playback
- Real-time astronomy, science and earth data visualization
- Training and support

SERVICE SOLUTIONS

Taking constant care of your technology does not only guarantee a fully operational system but also saves you money in the long run by protecting your investment and expanding its lifespan.

Electrosonic has been building and maintaining some of the most complex audio-visual systems in the world since its founding in 1964. An industry leading 90% service contract renewal rate reflects the high standard of service and value provided.

- CRITICAL SPARES EQUIPMENT PROGRAM
- PRIORITY REPAIR OF DEFECTIVE PRODUCT
- TECHNICAL PHONE SUPPORT
- ON-SITE DEDICATED TECHNICAL STAFF
- REMOTE MONITORING & MANAGEMENT
- SYSTEM PROGRAMMING SERVICES

PROJECTOR LAMP SALES

Reduce your projector lamp replacement costs and ensure you utilize only the highest quality lamps by purchasing your lamps from Electrosonic. We offer same day shipping, free recycling and a 90 day enhanced warranty. Besides a large inventory of original equipment manufacturer (OEM) lamps, we offer the highest quality OEM alternative lamps at up to 50% savings.

PROJECTOR LAMP REPLACEMENT PROGRAM

Electrosonic's Projector Lamp Replacement Program is a tailored service for digital planetariums that eliminates the hassle of procuring, purchasing and budgeting for your projector lamps.

By listening to our broad range of customers, and drawing on our own extensive experience with projection technology, we have developed a lamp program that offers a reduced cost of ownership and peace of mind that the quality of the theater display is preserved throughout its life.
